

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Original): A coolant line which comprises the following layers:

- I. an outer layer comprising a polyamide molding composition and
- II. an inner layer comprising polypropylene and at least 0.02% by weight of a heat stabilizer.

Claim 2 (Original): The coolant line as claimed in claim 1, wherein the layers I. and II. are joined to one another via a bonding layer.

Claim 3 (Original): The coolant line as claimed in claim 1, wherein the material of the inner layer is adhesion-modified.

Claim 4 (Original): The coolant line as claimed in claim 1, wherein the inner layer is composed of two sublayers of which the one adjacent to the polyamide layer is adhesion-modified.

Claim 5 (Currently Amended): The coolant line as claimed in ~~any of the preceding claims~~ claim 1, wherein the heat stabilizer is a sterically hindered phenol or a sulfur compound.

Claim 6 (Currently Amended): The coolant line as claimed in ~~any of the preceding claims~~ claim 1, wherein the molding composition of the inner layer or one of the inner sublayers contains from 0.1 to 50% by weight of a nanosize filler.

Claim 7 (Currently Amended): The coolant line as claimed in ~~any of the preceding~~  
~~claims~~ claim 1, wherein the molding composition of the inner layer or one of the inner  
sublayers comprises a metal deactivator.

Claim 8 (Currently Amended): The coolant line as claimed in ~~any of the preceding~~  
~~claims~~ claim 1, wherein the polypropylene of the layer II. has a melt flow rate (MFR) in  
accordance with ISO 1133 (230°C/2.16 kg) in the range from 0.1 to 3 g/10 min.

Claim 9 (Currently Amended): The coolant line as claimed in ~~any of the preceding~~  
~~claims~~ claim 1, wherein the polypropylene of the layer II. is a heterophase copolymer of  
propene and ethene.

Claim 10 (Original): The coolant line as claimed in claim 9, wherein the heterophase  
copolymer contains at least 0.5% by weight and not more than 20% by weight of ethene in  
copolymerized form.

Claim 11 (Currently Amended): The coolant line as claimed in ~~any of the preceding~~  
~~claims~~ claim 9, wherein the layer II. has a thickness of at least 0.3 mm.

Claim 12 (Currently Amended): The coolant line as claimed in ~~any of the preceding~~  
~~claims~~ claim 1 which is corrugated in subsections or in its entirety.

Claim 13 (Original): The coolant line as claimed in claim 12 which is configured as a  
corrugated pipe having a smooth inner layer.
